## Summary

Computer Science undergraduate with a strong foundation in full-stack engineering, mobile applications, and backend systems. Experienced in building reliable software from scratch, ranging from cross-platform mobile apps to structured REST APIs. Passionate about solving complex code problems and writing clean, maintainable systems, with complete technical documentation available at [sakithmandira.com](https://sakithmandira.com).

## Technical Skills

**Programming Languages:** Java, JavaScript, Python, Dart, Kotlin, HTML5, CSS3

**Frameworks & UI:** React, Flutter, Jetpack Compose, Electron, Tailwind CSS

**Backend & APIs:** Node.js, Express.js, FastAPI, RESTful APIs

**Databases:** MySQL, PostgreSQL, MongoDB, Firebase Firestore

**Cloud & DevOps:** Firebase Authentication, Supabase, Git, GitHub, Vercel

**Build Tools & Package Managers:** Maven, Gradle, npm

**Tools, Design & Environments:** Postman, Figma, Trello, ClickUp, Visual Studio Code, IntelliJ IDEA, Android Studio

## Education

**Informatics Institute of Technology (IIT) / University of Westminster**

**2024 – 2027**

*BSc (Hons) in Computer Science – Currently in 2nd Year*

*Colombo, Sri Lanka*

**Informatics Institute of Technology (IIT)**

**2023 – 2024**

*Foundation Certificate for Higher Education – Passed with Distinction*

*Colombo, Sri Lanka*

**Sandalanka Central College**

*GCE O/L – 6 As and 3 Bs, Distinction in Mathematics & English*

## Featured Projects

**ChurnPulse** | *FastAPI, React, PostgreSQL, scikit-learn – In Progress*

**2024**

- Engineered a SaaS churn prediction dashboard for Customer Success Managers to surface ML-driven customer risk scores and actionable metrics.
- Built a responsive frontend with sortable account risk tables, real-time KPI components, and interactive data visualisations for account login patterns.
- Designed a secure RESTful API using FastAPI with JWT authentication and an optimised relational schema across user records, billing history, and prediction vectors.
- Implemented a Soft-Voting Ensemble Classifier and Pruned Regression Decision Tree to classify churn risk and forecast customer lifetime value.
- Architected an automated background ML pipeline with a scheduler to trigger weekly batch predictions and asynchronously commit outputs to the database.

**VanGo** | *Flutter, Express.js, Supabase, WebSockets, Google Maps API, Firebase*

**2024**

- Engineered a real-time school transport management system focused on student safety, live GPS tracking, and automated attendance verification.
- Built REST APIs using Express.js for user management, trip tracking, and notifications; integrated Supabase for structured data storage and authentication.
- Developed real-time WebSocket communication enabling continuous GPS sync between driver and parent apps with geofencing safety alerts.
- Integrated PayHere for subscription payments and Firebase Cloud Messaging for push notifications including trip updates and emergency alerts.
- Designed background cron jobs for scheduled subscription validation, notifications, and system maintenance tasks.

 [Backend](#) · [Parent App](#) · [Driver App](#)

**ProcurePath** | *React, Electron, Supabase, Tailwind CSS*

**2024**

- Engineered a cross-platform desktop procurement document tracker using Electron with a secure relational database to manage and audit file access histories.
- Designed an optimised Supabase data model for user permissions, file access histories, and transactional procurement records.
- Built a modern admin interface in Tailwind CSS optimised for data-dense document workflows and real-time tracking updates.

 [github.com/Sakith-9900/PR-File-Movement-Tracking-System](https://github.com/Sakith-9900/PR-File-Movement-Tracking-System)

**Syncra** | *Flutter, Firebase Firestore, Firebase Auth, SQFlite, BLoC*

**2023**

- Developed a high-performance cross-platform mobile note management system on a unified Flutter codebase with cloud sync and offline-first storage.
- Implemented async cloud sync via Firestore with Firebase Auth; engineered an offline-first SQFlite engine for zero-latency startup reads.
- Integrated BLoC state management to cleanly separate presentation from data pipelines, ensuring fluid UI performance and predictable event flows.

## Mini Projects

---

**SmartCampusAPI** | *Java, JAX-RS, Maven*

**2024**

- Designed a RESTful Java API using JAX-RS and Maven to manage campus IoT sensors, infrastructure, and time-series data readings.
- Engineered a scalable persistence layer using a generic DAO pattern to cleanly separate system concerns and optimise database operations.
- Implemented domain-specific custom exceptions and global exception mappers for consistent error handling across integrated client applications.

 [github.com/Sakith-9900/SmartCampusAPI](https://github.com/Sakith-9900/SmartCampusAPI)

- Developed a native Android app enabling users to discover, view, and save culinary recipes via an external recipe database API.
- Engineered an offline-first experience using a local Room database for local recipe searches and manual data persistence.
- Built a clean, modular UI using Jetpack Compose with async background threads to maintain responsive performance during network actions.

 [github.com/Sakith-9900/Meal\\_Finder](https://github.com/Sakith-9900/Meal_Finder)

- Developed a native Android mathematical puzzle game where players solve grid-based arithmetic equations.
- Programmed game logic handling standard modes, advanced level systems, and a competitive countdown timer loop.
- Implemented real-time validation and active state management to track dynamic scores and provide instant visual feedback.

## Courses & Certifications

---

**English Diploma** — Aquinas College: Successfully completed the comprehensive professional diploma program.

**Web Design Fundamentals:** Mastered core modern UI/UX design principles, responsive wireframing, and interactive digital prototyping.

## Leadership, Volunteering & Sports

---

### Sandalanka Central College

- **Prefect** — Selected member serving on the active student Prefect Board.
- **Cricket Team Player** — Competitive player on the official cricket squad, contributing to regional victories.
- **Chess Player** — Tournament competitor representing the institution at school, provincial, and national levels.
